

# Zephyr Release Notes

## NM-ASR

### January 2026

The following features are included in the most recent release of Kite® Educator Portal and Kite® Student Portal.

#### New features:

- **Search by SSID on the Test Management/Test Coordination Pages** – Users can now search by State Student ID number to see all tests assigned to a single student rather than looking at all students assigned to a specific test session.
- **Link to Student's Tests in Student Profile Window** – When viewing a student's profile, users can now click on the link at the bottom of the pop-up window to be taken directly to the test sessions page to view any tests the student has assigned to them.
- **Screen Reader Enhancement for Response Options with Radio Buttons** – Enhancements to how screen readers read answer choices displayed in a table containing radio buttons, to improve accessibility and understandability by a user using a screen reader.

#### Updated features:

- **Updated Permission Visibility on PNP Summary Page** – The PNP summary page has been updated so that values for each setting are displayed rather than just the labels, and the additional PNP tabs have now been hidden from all users that have View Only permissions when accessing a student's PNP settings.
- **Upgrades to the EP Order Materials and Track Orders Screens** – The Order Materials and Track Orders screens have been updated to make ordering materials more straightforward and tracking individual items within orders (ie. Paper tests versus Student Score reports) easier for the users.
- **Update to Upload Enrollment Error Message Related to Duplicate Enrollment** – The error message displayed when a user attempts to enroll a student via upload with matching demographics under a different student ID than what is already loaded in the system has been updated to indicate that there is an existing student record rather than indicating that another student is already enrolled with those demographics.
